

# QUICKSTOP D.C INJECTION SYSTEM D.O.L

To help us to determine the correct model please answer the following questions:

	Question	Answer
1	What horsepower/kW is the motor?	
2	What is the full load current?	
3	What is the motor voltage?	
4	Is the motor single or dual speed?	
5	What is the application?	
6	How long does it take to get up to speed?	
7	How many stops / starts per hour?	
8	Method of starting D.O.L / star-delta etc.?	
9	Do you want manual reset? (This is normal)	
10	Is it a single or multi motor machine?	
11	If multi motors, are motors all the same size?	

For applications such as higher horsepowers, star-delta, slip-ringmotors and specific retardation rates - please consult with us for custom design.
