

SWH A01 Automatic Sanding Wheel Holder for Lathes

A new tool for sanding and refining the internal and frontal surfaces of bars for conventional lathes, with automatic movement of the abrasive tool, designed in accordance with ISO 23125: 2015 6.2.1p (prohibition to use hands for machining operations) which replaces, with maximum safety, the same dangerous operation usually performed manually. The device is fixed to the lathe toolcase turret and, thanks to the tension spring, the tool always adheres to the surface in an optimal way. The perfect efficiency of the device is guaranteed by an automatic sliding system (patented), which exploits the rotating movement of the workpiece. The device is provided with a tool holder nipper for 6 mm diameter. Supplied with: 2 off abrasive flaps for internal grinding and 1 off pad for front grinding.

Product	Description	Price £
SWH A01 Automatic sanding wheel holder	Complete with rotating abrasive tools & sanding pads.	£800.00
AW060-30	Rotating Abrasive Tool Ø30 H20mm grit 60	£8.00 each
AW060-40	Rotating Abrasive Tool Ø40 H20mm grit 60	£8.00 each
AW120-40	Rotating Abrasive Tool Ø40 H20mm grit 120	£8.00 each
AW240-40	Rotating Abrasive Tool Ø40 H20mm grit 240	£8.00 each
BD60	Base for self adhesive abrasive disks Ø60mm.	£20.00
AD080-60	Adhesive sanding pads. Ø60mm grit 80.	£2.00 each
AR502-SA01	Rotary Damper for SWH	£120.00
